OCEANAIRE: TROUBLESHOOT

If you are seeing a CON code, the unit has had the **water turned off to it momentarily, not enough water flow, water is too hot, or a combination of those.** To clear this code and reset the unit:

CON CODE

1. Turn the unit off by hitting the power button.

2. Make sure the water source is turned on with the cold water fully open.

3. Push in until you feel a 'click' on the small red button located near the bottom of the unit where the hoses connect.

4. Turn the power back on.
